Vital ID

A privacy-first portable health identity

One identity. Connected data. Smarter care.

From sleep and recovery to nutrition, activity, and secure sharing.

Your data, your control

Unified health view

Smarter insights

A healthier tomorrow

Build a healthier you →

Real data.
Real you.
A healthier world for everyone.

A healthie has a new identity

Fatima Al Mansoori

"A healthier, more energized me for what matters most."
— Fatima

Vital ID
Your portable health identity

A healthier tomorrow, together

SLIDE 2

The problem

Your health data is everywhere — but it doesn't work together.

Fatima uses multiple apps and devices to track her health, but her data is scattered, hard to access safely, and difficult to share, when she needs it.

Same data.
Diferent apps.
A harder life.

Fragmented data

Sleep, HRV, macros, and activity are spread across multiple apps and devices.

No portable identity

People don't have, one trusted health profile — their data lives in silos they don't control.

Sharing is messy

People rely on screenshots, PDFs, and ad-hoc sharing — often oversharing sensitive data.

Screenshot PDF

Too little user control

Consent is unclear, expiry is limited, and it's hard to revoke access once data is shared.

Share my data
Auto-expiry
Revoke access

Great health shouldn't be this complicated.

Real data.
Real you.
A healthier tomorrow.

A healthier tomorrow, together

03 | MEET FATIMA

Meet Fatima

Real data. Real you.
A healthier tomorrow, together.

Fatima Al Mansoori is a busy professional in Dubai who cares about her health, balance and long-term wellbeing. She uses multiple wearables and apps and wants one secure place to see her health data and share it with trusted people when needed.

Fatima Al Mansoori

34 • Dubai

Same data. A brighter you.

- Lives in Dubai
- Marketing Manager
- Health-conscious, family-oriented, always on the go
- Enjoys fitness, mindful living, and time with loved ones

> *"I want one health view I can actually use and share safely."*
>
> — Fatima Al Mansoori

Goal

Improve sleep and recovery

Uses

WHOOP · Oura · Apple Health · MyFitnessPal

Needs

One view of her data plus trusted selective sharing

Pain points

- Data is scattered across multiple apps
- Hard to see the full picture
- Unclear what to share and with whom
- Wants trustworthy privacy and control

Goals

- Better sleep, more energy and recovery
- One unified, easy-to-read health view
- Simple and secure sharing with family and doctors
- Stay consistent and make healthier choices

Real people. Real data. A healthier world for everyone.

Vital ID

Slide 9

Your AI wellness coach

Connected data + personal goals = relevant, everyday guidance.

One view becomes useful action

✓ **Sleep & recovery**
Spots changes against your baseline and prioritises your goals.

✓ **Activity & nutrition**
Turns connected signals into practical lifestyle suggestions.

✓ **Mood & wellbeing**
Surfaces gentle prompts when patterns suggest extra recovery.

Wellness guidance only. Never medical advice.

Vital Coach

Today, based on Fatima's data

Sleep	**HRV**	**Activity**
5.4h	**53 ms**	**53 min**
Below goal	Within range	On track

TONIGHT Protect a consistent wind-down window and aim for more sleep.

MOVEMENT Your activity is on track. Keep today light and consistent.

HYDRATION Stay close to your personal hydration target throughout the day.

From tracking health to understanding what to do next.

Vital ID
Your portable health identity

How selective sharing works

You control your data. Share what matters, with who you trust.

A healthier tomorrow, together

1 Connect data sources

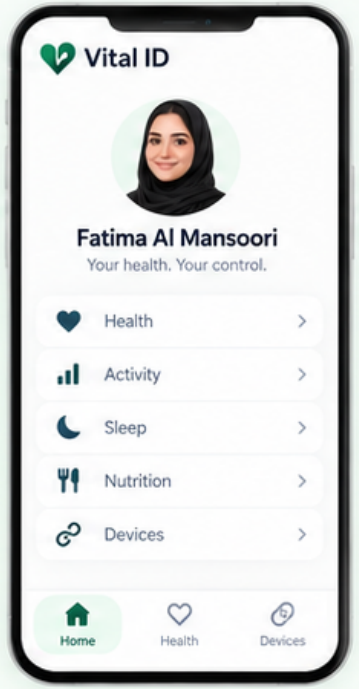
Link your health and lifestyle apps in one place.

- Apple Health
- Fitness apps
- Sleep apps
- Nutrition apps
- Wearables
- Health records

All your health data in one place!

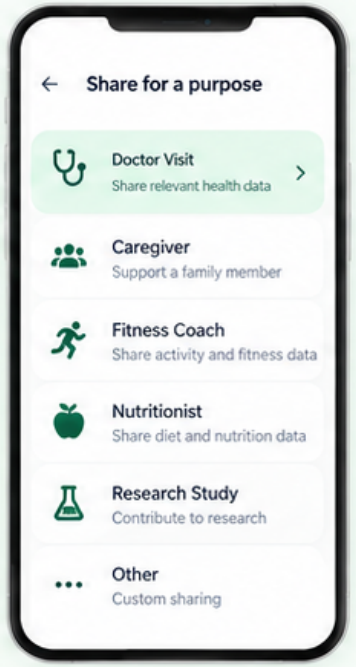
2 Build the Vital ID profile

Your data is organized into a single, secure profile.



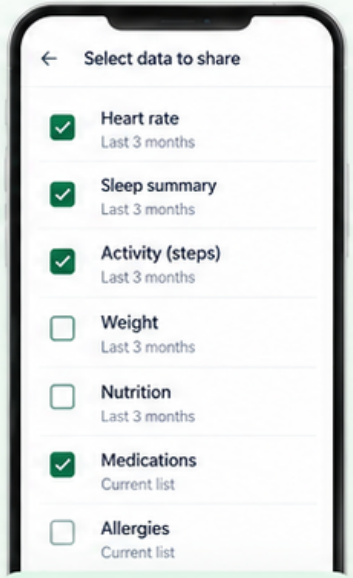
3 Choose a purpose

Select why you're sharing your data.



4 Select only the fields to share

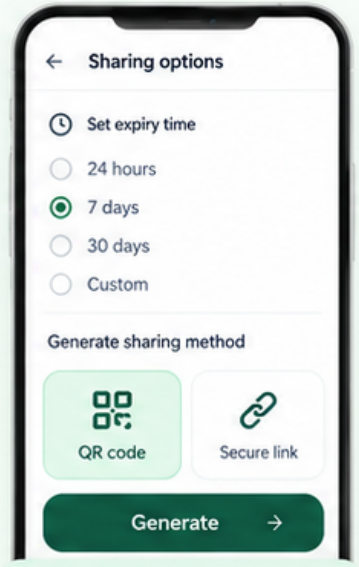
You choose exactly what to share.



Field-level sharing
You stay in control

5 Set expiry & generate QR/link

Choose how long to share and create a secure link or QR code.



Time-limited
You decide how long

QR or link
Share securely

6 Recipient opens secure view

They see only what you shared. You can revoke access anytime.

Only what Fatima shared — nothing more.

Revoke instantly
Stop access anytime

Real data. Real you. A healthier world for everyone.

Same data. Your choice. A healthier tomorrow.

Vital ID
Your portable health identity

A healthier tomorrow, together

Slide 9

Built for consent and trust

Share only what matters, for only as long as needed.

Your data. Your control.

Field-level control

Choose exactly what to share.

- Sleep
- Heart rate
- Activity
- Nutrition
- Medications

Time-limited access

Set how long others can access your data.

- 1 hour
- 1 day
- 7 days
- 30 days
- Custom

Instant revocation

Take back access anytime, instantly.

Access revoked

Secure storage

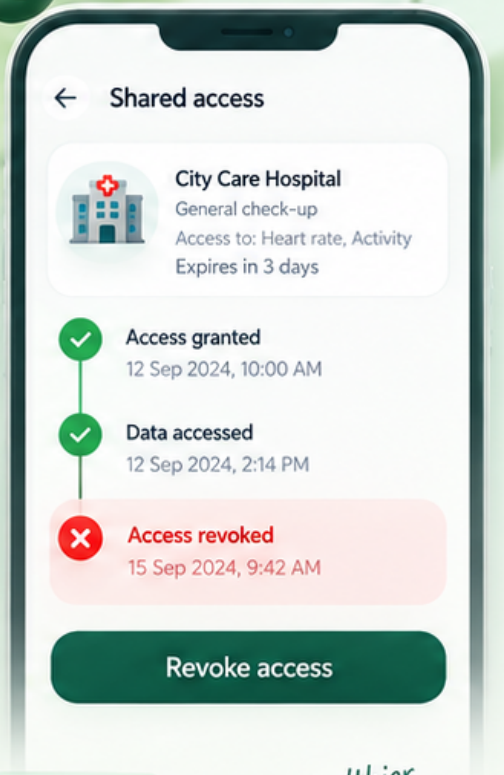
Your data is encrypted end-to-end.

Encrypted and secure

Portable identity

You own your data. Take it with you.

Your health. Anywhere.



Trusted by you. Designed for a healthier tomorrow.

Private. | Your data. | A healthier you.

Healthier people happier tomorrows

Vital ID
Your portable health identity

Slide 11

Share a health report directly

Choose a recipient, send only the approved report, and keep control.

From Fatima to a trusted recipient

1. Choose report
2. Choose insurer
3. Send secure link
4. Revoke anytime

Example insurer destinations in the current demo

- Daman
- GIG Gulf
- Sukoon
- ADNIC
- Orient
- Bupa
- Allianz Care
- Cigna
- MetLife

Selective fields + expiry + secure link + instant revocation.

Slide 10

Community, built around real life

Find people by city, goals and hobbies - not by exposing health data.

Connect around what matters

C **Cities**
Dubai, Abu Dhabi, Riyadh, New York, London and more.

H **Hobbies**
Fitness, hiking, travel, yoga, cycling, running and more.

G **Goals**
Suggested groups can reflect personal wellbeing goals.

Suggested for Fatima

D **Dubai**
8.4k members

A **Abu Dhabi**
5.1k members

R **Riyadh**
4.7k members

B **Barcelona**
3.9k members

Fitness | Travel | Yoga
Cycling | Running | Photography

Community adds motivation and belonging - while Vital ID keeps health sharing consent-led.

Vital ID
Your portable health identity

Real life.
Real benefits.
A healthier
tomorrow.

Slide 10

High-value use cases

One identity. Many moments. A healthier, brighter Fatima.

1 Doctor visit

Fatima's doctor gets a clear picture of her health — instantly.

Faster context

Helps doctors make more informed decisions, in less time.

2 Coach or nutritionist

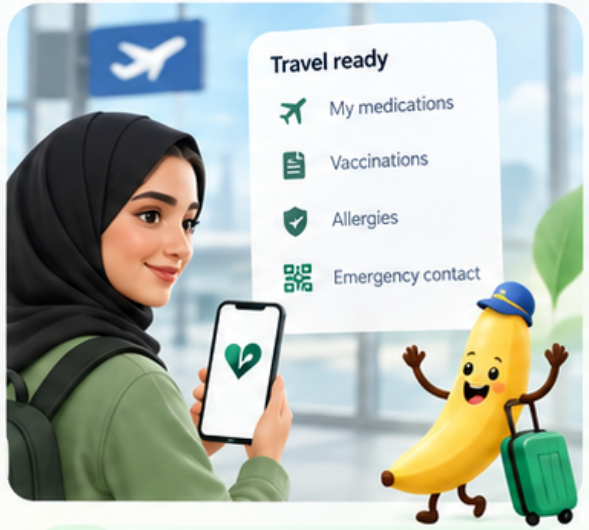
Fatima shares her relevant data to get personalized guidance.

Less friction

Fatima avoids repeating her history and gets more relevant advice.

3 Travel or wellness check

Fatima travels with confidence, with key health info at her fingertips.

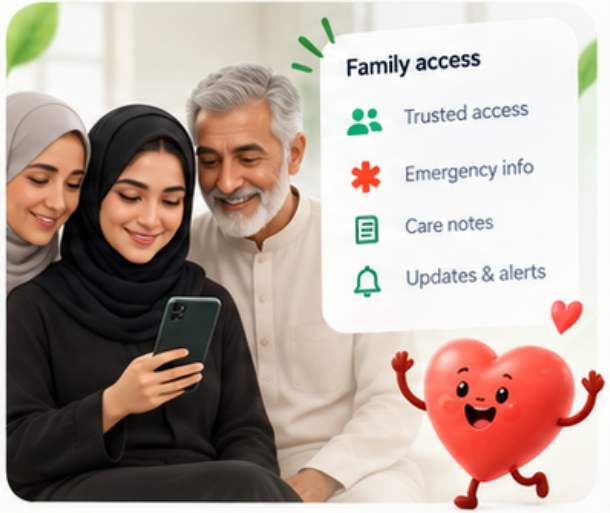


Share only what matters

Fatima stays in control, sharing the right information for each situation.

4 Family or caregiver support

Fatima gives her family peace of mind with safe, easy access when needed.



Better continuity of care

Loved ones can support Fatima, even from afar.

For Fatima, Vital ID turns everyday moments into healthier possibilities.

Same data.
A brighter you.
